

ResnetLSTM: Contains screenshots for captions of 7 images, captions generated using a resnet-152 encoder. file format: epochx_imgsy.png where x is the number of epochs network has been trained for and y is either 1 or 2. If y is 1, images 1 to 4 are displayed, if y is 2, images from 5 to 7 or 4 to 7 are displayed, alongside captions in both cases.

Loss value screenshots are included as well for epoch 1 and epoch 5.

VGGLSTM: Contains screenshots for captions of 7 images, captions generated using a VGG16 encoder. file format: VGG_epoch1_imgsy.png. If y is 1, images 1 to 4 are displayed, if y is 2, images from 5 to 7 are displayed, alongside captions in both cases.

Loss value screenshots included as well for epoch 1.
